

IS-600-GOTCHA RESCUE KIT - INDUS PPE

DESCRIPTION

- ✓ Remote Rescue Pulley System 50m Rope Length
- ✓ Remote rescue of casualties suspended from fall arrest equipment.
- ✓ Intuitive to use by casualties' co-workers
- ✓ Equally efficient for lifting or lowering rescues
- ✓ Up to 50m lowering height
- ✓ Enhanced pulley system for more efficient lifting and greater control when lowering
- ✓ No cut operation
- ✓ Compact bag design for improved access through hatches and hooped ladders
- ✓ Rescue method where the rescuer does not need to descend to the victim.
- ✓ Equipped with a reach-stick/ reach pole extendable up to 5 meters to reach the victim.
- ✓ Features that facilitate transferring the victim's load from the lanyard to the pulley.
- ✓ Pre-assembled, ready to use without mistakes. In panic situations, it is often forgotten or assembled incorrectly, resulting in lost golden moments, and the rescuer can become a victim.
- ✓ In escape mode, when the first user descends and arrives safely at the base, the next user can immediately use the hook without having to retrieve the hook from the first user.
- ✓ In rescue mode with the rescuer approaching the victim, INDUS 600 can be used simultaneously for two people.
- ✓ Effective length available as needed up to 200 meters.
- ✓ Can be used on various structures and areas.

SPECIFICATIONS

	Rope Length	50 m
	Effective Length	Up to 200 m
	System Weight (Approx.)	6.5 kg
	Users	2 Persons (Simultaneous)
	Performance Standard	Meets Relevant Standards

SINGLE PERSON USE

For raising or lowering a single casualty by a single rescuer.

READY TO USE

READY TO USE

Pre-assembled kit. No assembly required, essential in what can be a stressful situation.

RESCUE IN EITHER DIRECTION

Raise or lower the casualty to safety.

INTUITIVE TO USE

Colour coded for simplicity and the anchor sling is normally secured to the casualty's own anchor point.

REMOTE ATTACHMENT

Allows the rescuer to reach the target at a fully deployed fall arrest lanyard from a point of safety.

NO CUT OPERATION

Not possible to drop the casualty. The casualty is raised or lowered to safety after original attachment, so there is no risk of accidental release.

TWO PERSON RESCUE

In rescue mode with the rescuer approaching the victim, INDUS 600 can be used simultaneously for two people.

EFFECTIVE LENGTH

Effective length available as needed up to 200 meters.

IDEAL FOR
